ISO 14001 Internal Auditor Training Abu Dhabi

> Abu Dhabi–focused delivery aligned with ISO 14001:2015 and ISO 19011. Scenarios reflect ADNOC upstream/downstream sites, ICAD/Mussafah manufacturing, KIZAD logistics, and power/water utilities.

Service Objectives

- Develop internal auditor competence aligned with ISO 14001:2015 and ISO 19011.
- Plan and conduct risk-based EMS audits with strong audit trail integrity.
- Gather verifiable evidence and evaluate compliance with UAE/Abu Dhabi legal requirements.
- Issue clear, actionable nonconformities with requirement citations and risk significance.
- Close findings effectively using root-cause tools and risk-based prioritisation.

Who This Service Is For

- EHS managers, EMS coordinators, shift supervisors, production engineers, maintenance leads, and quality professionals in Abu Dhabi.
- Project-based teams on construction or turnaround scopes verifying contractor EMS conformance across Mussafah, ICAD, KIZAD, Ruwais, and Khalifa Port.
- Organisations preparing for ISO 14001 certification/recertification or integrating ISO 45001/ISO 9001 into an IMS.
- Teams onboarding new internal auditors or responding to OSHAD-aligned expectations for systematic self-audits.
- Applicable across oil and gas, petrochemicals, construction, logistics, manufacturing, and utilities operating in Abu Dhabi.

Duration & Process Overview

- Classroom + Exercises: 2 days (14–16 hours), 8–14 delegates; on-site in Abu Dhabi or hybrid; knowledge quiz and scenario-based nonconformity writing.
- Classroom + Live On-Site Practicum: 3 days (21–24 hours), 6–10 delegates; on-site at your facility; observed audit interviews and report drafting.
- Distributed Sessions (Shift-Friendly): 4 half-days, 8–14 delegates; hybrid with site-based tasks; modular quizzes and evidence sampling tasks.
- Pre-training scoping and a brief training needs analysis ensure exercises mirror your processes, aspects, legal register, and current audit templates.

Methodology

Phase	Objective	Key Deliverable

Pre-training scoping & TNA	Reflect your processes, aspects/impacts, legal register, and audit templates.	Scoping brief and tailored exercise pack.
ISO 14001:2015 fundamentals	Context, leadership, risks/opportunities, aspects/impacts, controls, performance, improvement.	Baseline competence on standard requirements.
Abu Dhabi legal & other requirements	Integrate UAE federal law, OSHAD-aligned expectations, and Abu Dhabi permits.	Legal linkages within checklists and findings.
ISO 19011 audit principles	Integrity, fair presentation, due care, confidentiality, independence, evidence-based approach, risk-based thinking.	Calibrated auditor behaviours and ethics.
Audit planning & checklist design	Set objectives, scope, criteria, methods; sampling plans; process-flow and legal-register-aligned checklists.	Tailored audit plan and checklists.
Conducting the audit	Interviews, observations, document/record sampling; trace aspect controls to KPIs.	Verifiable evidence set and audit trail.
Writing nonconformities	Grading, evidence statements, requirement citations, risk significance, and clarity.	Clear, actionable NCs and findings log.
Root cause & action closure	Containment, correction, corrective action, effectiveness verification, risk re-evaluation.	Root-cause analysis and closure plan.
Integrated auditing (optional)	Align ISO 14001 audits with ISO 45001/9001 to reduce disruption and increase value.	Integrated process-based checklist approach.
Assessment & certification	Knowledge checks, scenario-based NC writing, observed interviews and closing meetings.	Targeted feedback and NPM certificate of completion.
